SUSPICIOUS OF PROMISED RISE

Inside Interests Said to Be Tak ing Advantage of Present Prices, Leaving Future Alone.

ACTIVITY MUCH LESS MARKED

Bond Market Narrow, but Prices Did Not Suffer from Diminished Demand.

NEW YORK, May 10.—There was considerable falling off in speculative interest and activity in the stock market to-day, operators being less disposed to accept the lead offered by the bidding up of special stocks. The reaction was more positive in the final dealings. This hesitation found its explanation in the speculative position in the market itself, rather than in any developments in the news, which was in fact favorable.

The professional speculative element has grown suspicious that well informed inside interests have been feeding out holdings of stocks at the recently prevailing levels, prompted by satisfaction with present urless and distrust of promised further advances. The small vibration in prices of former speculative leaders, while new stocks are being advanced, is cited as evidence of such a process going on throughout the list.

This condition was corrected to some extent by the diversion of strength to some of the granger railroad stocks. The movement was based upon the improving chances believed to be resulting for grain crops on favoring weathing.

The fresh return from Europe of a capitalist of large influence was supposed to be associated with the movement in the Rock Island stocks and certain industrials.

Lending rates for fixed periods were marked up again to-day in the money market. In connection with the hardening prospect for money rates, the bond market was narrow to-day, although prices did not suffer from the diminished demand. Total sales of par value, \$6,358,000. Unled States bonds were unchanged on call. Total sales, 790,300 shares. 790.900 shares.

NEW YORK, May 10.—The cotton market was nervous and irregular to-day without more than moderately active and with fluctuations comparatively narrow. The close was steady, net 2 points lower to 4 points higher, May being lower and other months about 1@4 points higher. The market opened steady at a decline of 4 points on May, but generally 1@2 points higher, and during the early session sold up to a net advance of 2@6 points on rather steadler cables than expected, reports that the Texas rains over Sunday had been too light to be of much assistance, bullish private crop reports, particularly from parts of Missispip, and continued reports of improvement in general trade conditions, increased offerings of May, which were supposed to be against cotton to come here for delivery before the end of the month checked the upward movement during the forenon and prices gradually eased off under those offerings, realizing by old longs and local bear pressure. May sold off to 10.65 and 19.57, and later positions eased to within a point of two of Squirday's finals. At this level there was a renewal of demand, promoted by the forecoast for frost in parts of the Zasiern belt, but after working up to a act gain of 6@3 points on the active positions there was another set-back on re-
